GLI 212.30: Issues in Globalization Studies and International Relations
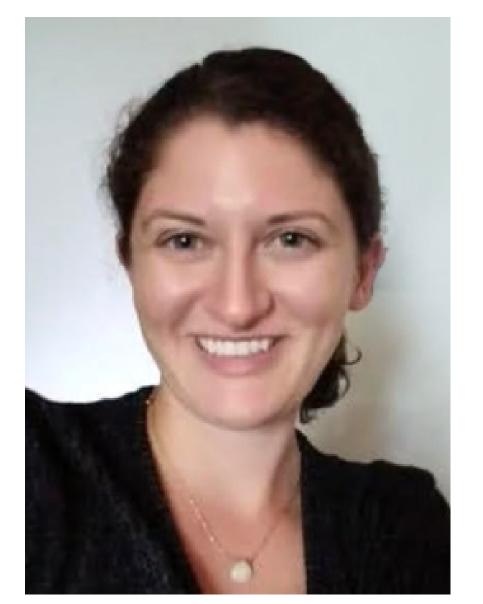

Global Data Analysis

Winter 2025

3 Credits: GLO, HUM
Online Asynchronous
Winter Session (January 7-24)

GLI 212-30 *Global Data Analysis* provides an introduction to both qualitative and quantitative data analysis techniques within a global context.

Explore the significance of data analysis in:
- Addressing global challenges
- Research question formulation

Explore qualitative methods, including
- Interviewing skills
- Ethical considerations when applying basic data analysis techniques to human subjects

Explore quantitative research methods:
- Basic understanding of interpreting data visualizations
- Using quantitative methods to understand real-world global issues
