

Stony Brook School of Dental Medicine Mandatory Professional Licensure Disclosure

New York State prides itself in the high quality of its licensed and certified professionals. For the protection of its citizens, each license and certificate has requirements that individuals must meet in order to be licensed or certified in New York State. SUNY's academic programs leading to licensure or certification are carefully designed to meet and exceed these State requirements. This is a role SUNY plays in protecting the public. Other states frequently have their own requirements, so if your goal is to practice in another state, this disclosure will help you check to see what that state requires.

Per U.S. Federal Regulations, §668.43 (2019 Rule), and in compliance with the State Authorization Reciprocity Agreements (SARA) Manual version 19.2, SUNY Stony Brook provides the following disclosure related to the educational requirements for professional licensure and certification.

The Stony Brook University School of Dental Medicine's DDS program is accredited without reporting requirements by the Commission on Dental Accreditation (CODA), and if successfully completed, meets the educational requirements for dental licensure in each state.

This Disclosure is strictly limited to the SUNY Stony Brook's determination of whether its educational program, Doctor of Dental Surgery, that if successfully completed, would be sufficient to meet the educational licensure or certification requirements in a state for the practice of dentistry. SUNY Stony Brook cannot provide verification of an individual's ability to meet licensure or certification requirements unrelated to its educational programming. Such individual determinations are made by state licensing boards and are fact-specific determinations.

This disclosure does **not** provide any guarantee that any particular state licensure or certification entity will approve or deny your application. Furthermore, this disclosure does **not** account for changes in state law or regulation that may affect your application for licensure and occur after this disclosure has been made. **Enrolled students and prospective students are strongly encouraged to contact the States' licensure entities where they are considering practicing, using the links provided below to review licensure and certification requirements imposed by those state(s).**

SUNY Stony Brook has designed an educational program curriculum for the Doctor of Dental Surgery degree that if successfully completed **is sufficient to meet** the licensure and certification requirements for the Doctor of Dental Surgery license in the following states:
