Please apply by May 1, 2023

East End Explorer is looking for interns to work with our East End Explorer Camp and Junior Explorer Camp located at 1640 Conscience Point Rd in Southampton for summer 2023.

Outdoor education and recreation programs run all summer focusing on the coastal habitats on Long Island's estuarial waters of the salt marshes and local bays. Through tactile experiences, we encourage and guide campers to investigate the ecosystem while learning about the flora and fauna of the area.

Our mission is to instill in our campers a sense of stewardship of the natural world through hands-on, immersive experiences.

Daily activities include:

- Supervising children while kayaking and boating.
- Engaging with campers by providing physical and emotional support while they face challenges and new experiences.
- Assisting in catching animals for experiential learning through seine netting, clamming, crabbing, fishing, swimming and hiking.
- Guiding campers safely on and off the water.
- Assisting Explorer team in basic gear maintenance and storage.

In addition to learning about the subjects covered with our programs, interns will have the opportunity to learn first hand how an eco-tour business operates, gain practical water safety skills, and experience teaching and guiding children in an outdoor space.

Compensation: Varies based on experience.

Dates: June 5th- September 1st

Hours required: 8:30am-3pm, Monday-Friday.

Opportunities for additional experience on weekends and evenings may be available.

To apply, email resume and cover letter detailing interest in the internship to paddletour@gmail.com with "Explorer Camp Internship" in the subject line. Include dates of availability June-September in the cover letter. All interns who apply should be fully vaccinated and boosted for Covid-19, must have reliable transportation, and be available all summer.
