

Changes to the Concur Home Page

The Concur platform now features a new, refreshed home page. The same functionality will exist, however users will notice a more modern design that simplifies navigation across the platform and provides an enhanced user experience.

Users can activate the new homepage through a banner, and may still revert back to the legacy homepage through the same banner. In late October, the new homepage will become the default, however, users can still access the legacy homepage until January 2025 at which time the homepage will be retired.
